

AMRI Dental conducts Eastern's India's first ever 'Zygomatic Implant Workshop and Live Session'

~**Prof. Dr. Gunaseelan Rajan**, renowned Oral and Maxillo-facial surgeon conducts the workshop~

Kolkata, 8th July, 2017: AMRI Dental Studio, a part of AMRI Group of Hospitals conducted Eastern India's first ever "**Zygomatic Implant Workshop and Live Session**" at **AMRI Mukundapur today**.

Prof. Dr. Gunaseelan Rajan, renowned Oral and Maxillo-facial surgeon, academician, scientist and researcher, based in Chennai, **conducted the workshop and live Zygomatic Implant session for the first time in Eastern India**.

Zygomatic Implants is a new technology that was developed in Europe to do upper jaw dental implant treatments without using the hipbone graft. This 'graft-less technique', uses the cheekbone (Zygoma bone) to anchor the longer zygoma implants. This is different from conventional dental implants in that they anchor in to the zygomatic bone (cheek bone) rather than the maxilla (upper jaw). Zygoma implants are appropriate for any person with missing or shaky teeth in their upper jaw, insufficient bone in the upper jaw to sustain regular implants, as well as those who are wearing complete dentures. They are appropriate for all age groups except children. The new artificial set of permanent teeth are fixed almost immediately (2-3 days) allowing them to eat normal food and smile confidently.

Speaking at the session, Prof. Dr. Gunaseelan Rajan, renowned Oral and Maxillo-facial surgeon, academician, scientist and researcher said, "Zygomatic Implantation technique is the latest and the most advanced technique used in dental implantation surgery today. It is a time saving as well as cost saving technique since a fixed row of teeth can be fixed in 72 hours as opposed to 6 months required in a conventional implantation and the patient can immediately eat normal food and smile confidently. I am grateful to AMRI Hospitals, for inviting me to conduct the first Zygomatic Implantation Workshop and Live Surgery Session in Eastern India."

Speaking about the session, Mr. Rupak Barua, CEO, AMRI Hospitals Ltd, said, "AMRI Dental is pleased to conduct Eastern India's first ever Zygomatic Implantation workshop cum live implantation surgery for dental students, faculties and medical practitioners. The workshop by eminent Oral and Maxillo-facial surgeon, Dr. Gunaseelan Rajan would enrich and empower the commitment of dental practitioners of providing best of surgical treatment to their patients".

AMRI Hospitals has been the frontrunner in providing international holistic care to patients in Eastern region. The AMRI Hospitals, Mukundapur unit has world-class facilities, providing round-

the-clock multidisciplinary care, where patients can look forward to better and improved outcomes.

About AMRI Hospitals Ltd

AMRI Hospitals, a multi-specialty healthcare facility in Eastern India with specialization in Oncology, Neuro Sciences, Cardiac Sciences, Orthopedics, Emergency & Trauma care, Gynecology & Childcare is the largest player in private sector with its existing strength of around 1000 beds. With its state-of-the-art equipment and modern facilities, AMRI is ensuring that people from Eastern India are provided affordable high quality medical care in the region, so that patients need not travel to other parts of the country for medical treatment. Capacity expansion is also underway at AMRI for additional beds in its existing facilities in Kolkata. A 400 bedded state-of-the-art super-specialty hospital has recently become operational in Bhubaneswar. AMRI Hospitals will soon be setting up a new 400 bedded facility in West Bengal with an investment of Rs.500 crs. The Group is committed to serve the people of Eastern India and has plans to add another 600-700 beds in the next 3-4 years.
